

Open-source Contribution

Description

AIConfig is an open-source framework to build generative AI apps. With AIConfig you can use models from any provider or endpoint. Your task is to support the Replicate endpoint by adding a ModelParser class to AIConfig.

AIConfig: <https://github.com/lastmile-ai/aiconfig>

Level

Advanced

Type of Project

- Software engineering
- AI/ML

Additional Considerations

- Advanced software engineering skills
- Familiarity with Github and open-source contributions

About the Client

LastMile AI is a developer platform for software engineers to build with generative AI models in production. Our mission is to empower engineering teams to drive AI innovation across verticals and industries.
