

Streamlit App with AIConfig

Description

Build out a streamlit app with AIConfig. You can base the streamlit app off a research paper or a prototype of an app. Must be hosted on Streamlit Cloud - will be shared on LastMile Twitter! AIConfig is an open-source tool to build with AI models from any model provider or endpoint.

Here is an example: <https://chain-of-verification.streamlit.app/>

AIConfig: <https://github.com/lastmile-ai/aiconfig>

Level

Intermediate

Type of Project

- AI/ML

Additional Considerations

- Familiarity with Streamlit

About the Client

LastMile AI is a developer platform for software engineers to build with generative AI models in production. Our mission is to empower engineering teams to drive AI innovation across verticals and industries.
