Purpose: Reference letter for Leandro Miranda Fahur Machado

To Whom It May Concern,

I am pleased to write this letter of acknowledgment for Leandro Miranda Fahur Machado, who has successfully completed a project for **LastMile AI** through the **Lonely Octopus** AI program. LastMile AI is dedicated to empowering engineering teams to drive AI innovation across various verticals and industries, and Leandro's work has exemplified this mission.

Leandro's project involved building out a Streamlit app with AIConfig. This task required using AIConfig, an open-source tool, to integrate AI models from any model provider or endpoint. Leandro had the option to base the Streamlit app on a research paper or a prototype of an app, and the final product was hosted on Streamlit Cloud for sharing on LastMile's Twitter.

Leandro began by developing a detailed proposal, outlining the project's scope and objectives. He integrated the latest models to enhance the app's functionality. His dedication and expertise were evident in the quality of the final product, which was successfully delivered.

We are particularly impressed with Leandro's ability to manage and execute this project efficiently. His work not only met but exceeded our expectations, and we believe it holds great potential for being featured on platforms by LastMile and streamlit.

We highly commend Leandro for his outstanding contribution to this project and look forward to seeing his continued success in future endeavors.

Sincerely,

Tanya Rai
Founding Product Manager
LastMile AI
